Welcome to United Apartments! We want to make setting up your internet account simple. If you lived with us in the past, we have a new registration process. Devices such as iPads, iPod Touches, iPhones and other smartphones are now supported! Each tenant can register a total of four devices. We hope these steps make for an easier registration process for you.

**You will need your account number in order to setup your internet service.** If you don't have it, please contact your Leasing Office. (see contact info above)

**To set up your internet service, please do the following:**

Connect your computer to your wall jack or connect to the wireless network name "UNITED" (where available) and open your web browser. Your web browser will automatically take you to the "Internet Account Registration" page.

To register a device that does not have a web browser or to view and edit registered devices on your account, visit <http://www.LiveWithUnited.com/InternetSetup>.

We hope you find these instructions user friendly. Please call your Leasing Office (see contact info above) or CMS at (989) 779-1800 with any questions.

**Thank You!**
